### **DETAILED ACTION**

#### **EXAMINER'S AMENDMENT**

 This application is in condition for allowance except for the presence of claims 7-18 to species non-elected without traverse. Accordingly, claims 7-18 have been cancelled.

### Election/Restrictions

2. This application contains claims directed to the following patentably distinct species of the claimed invention: Group I, claims 1-6, are drawn to a method for detecting a malfunction of an injection molding machine during a die clamping step, wherein force and position are monitored. Group II, claims 7-12, are drawn to a method for detecting a malfunction of an injection molding machine during a die clamping step, wherein force and time are monitored. Group III, claims 13-15, are drawn to a method for detecting a malfunction of an injection molding machine during a die clamping step, wherein pressure and position are monitored. Lastly, Group IV, claims 16-18, are drawn to a method for detecting a malfunction of an injection molding machine during a die clamping step, wherein pressure and time are monitored.

Application/Control Number: 10/653,923

Art Unit: 2636

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. During a telephone conversation with Jeff Karceski on 01/25/2005 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-6. Affirmation of this election must be made by applicant in replying to this Office action.

Application/Control Number: 10/653,923

Art Unit: 2636

----

Claims 7-18 are withdrawn from further consideration by the examiner, under 37 CFR 1.142(b), as being drawn to a non-elected invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

## Allowable Subject Matter

- 5. Claims 1-6 are allowed.
- 6. The following is an examiner's statement of reasons for allowance: Prior art fails to teach or suggest a method of detecting a malfunction during a die clamping step in an injection molding machine, wherein a reference pattern is obtained showing a relationship between the die clamping force and the position of the moveable platen, while die clamping is being performed. In addition the die clamping force is monitored during the clamping process, and if its value exceeds an acceptable limit, an alarm'is issued, to indicate a malfunction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2636

# Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George A Bugg whose telephone number is (571) 272-2998. The examiner can normally be reached on Monday-Thursday 9:00-6:30, and every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeff Hofsass can be reached on (571) 272-2981. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov.
